## Delayed Egress Lock – Annual Inspection

Name of Property: ________________________________________ Date: ____________________

Location of Door with Delayed Egress Lock: ____________________________________________________

Name of Technician: ________________________________________________________________________

Affiliation of Technician: ____________________________________________________________________

Signature of Technician: _____________________________________________________________________

Evaluate each delayed egress locking arrangement for compliance with the following requirements:

<table>
<thead>
<tr>
<th></th>
<th>Pass</th>
<th>Fail</th>
<th>N/A</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The locking hardware is approved and listed for the purpose of delayed-egress.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2.</td>
<td>The door equipped with the delayed-egress lock serves low or ordinary hazard content.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.</td>
<td>The entire building is fully protected with sprinklers or smoke detectors.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4.</td>
<td>The door unlocks in the direction of egress upon activation of the sprinkler system, a heat detector, or not more than two smoke detectors.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5.</td>
<td>The door unlocks in the direction of egress upon a loss of power to the lock.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6.</td>
<td>An irreversible process unlocks the door in the direction of egress 15-seconds upon application of a force to the releasing device under the following conditions:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• The force cannot exceed 15-lbf</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• The force is not required to be applied for more than 3-seconds continuously</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• An audible signal is activated in the door vicinity upon initiation of the release process</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Relocking of the door is by manual means only once the lock has been released</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7.</td>
<td>A readily visible, durable sign in 1-inch tall letters and not less than 1/8-inch stroke width on a contrasting background must be located on the door leaf adjacent to the release device and reads: PUSH UNTIL ALARM SOUNDS – DOOR CAN BE OPENED IN 15 SECONDS</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>8.</td>
<td>The egress side of the doors equipped with delayed-egress locks must be provided with emergency lighting.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

All “Failed” issues must be repaired and re-tested. Source: NFPA 101-2012, 7.2.1.6.1
